

# Abstract

The present invention provides a compound represented by formula (I):

[wherein X--Y--Z represents R<sup>5</sup>N-C=O (wherein R<sup>5</sup> represents a hydrogen atom, substituted or unsubstituted lower alkyl, substituted or unsubstituted aralkyl, substituted or unsubstituted lower alkenyl, or substituted or unsubstituted lower alkynyl), etc;

R<sup>1</sup> and R<sup>2</sup> may be the same or different and each represents a hydrogen atom, substituted or unsubstituted lower alkyl, etc; and

R<sup>3</sup> and R<sup>4</sup> may be the same or different and each represents a hydrogen atom, substituted or unsubstituted lower alkyl, etc], or a pharmaceutically acceptable salt thereof.
